

## CPW 252 Spring 2021 Homework #1

Make an Android project with buttons and text as shown below for a game of TicTacToe.

Note that there are 9 buttons that show the Xs and Os, one text area showing instructions and messages, and a button for New Game.

Future assignments will be to make the game work. You don't need to make the buttons show X or O at this time. That will be in Homework # 2. You don't need to be able to play the game. That will be a later assignment. Assignment #1 is only about getting the layout correct. The layout should be specified entirely in the XML.

Note: When I first did this project, it was easy to put a graphic in the title bar. I don't seem to be able to do it with the new version of Android Studio. So you don't need to put a tictactoe board in the title board.
